STAT

Director, NPIC

Reforming of the Agency's Research and Development
Advisory Group

1. For many sessions in years past you will recall having served on Wally Lampshire's committee devoted to rounding up new R & D items. You know that this committee has been dormant now for many months.

2. Dr. Gottlieb has just been appointed Mr. Bissell's scientific advisor and he is renewing the R & D news roundup type of meetings very soon. He asked for the name of a representative from NPIC to sit in on these meetings. I have given him your name. He will be contacting you directly.

A. C. LUNDAHL
